

Meeting Agenda

Date: Mar 31, 2020 **Time:** 10:30 am **Location:** MS Teams

Topic 1: Showcasing the work we've done so far in the application.

Topic 2: Questions about the calibration session:

- Are we getting a grade for the calibration session?
- Are we going to get feedback on the application? Or is it an examination?
- Are we going to show the proof of concept only (that we finished in week 7), or are we also going to show the further improvements we made on it between week 7 and the calibration session?
