

Iteration Plan

Iteration 1

Scrum Activities:

- Planning: Include tasks that are already planned for the first iteration which can be seen below in section **Activities and Tasks**
- Daily Scrum: Update the progress of each task per day in a 15 minutes time-boxed meeting
- Review: Show our progress and deliverables of iteration 1
- Retrospect: Have a time-boxed meeting where the team should evaluate and give feedback from the first iteration
- Refinement: Have time-boxed meeting during iteration 1 to define tasks for the completion of the application

Activities and Tasks:

- Designing software and implement the initial set-up of application with a basic set of functionalities as written in the project plan on the first iteration
- Documenting and creating reports
- Update user requirement specification report
- Update work division report
- Plan activities, tasks, and deliverables for the next iteration
- Designing UI for the application

The estimated duration is 25 days.

Planned Deliverables:

1. URS
2. Initial working application and source code
3. Work division report
4. Plan for iteration 2
