

# Meeting Minutes

---

**Date:** March 3th, 2020

**Time:** 12:00 – 12:40

**Location:** R1-3.98

---

Week 2

A

Because we didn't have enough time to discuss all of our questions during our meeting for this week our mentor decided to schedule another meeting on the 4<sup>th</sup> of March. Therefore, the Meeting Minutes Document is divided in two parts, A and B.

## **Topic 1: project plan**

- Gantt Chart is okay
- Discussion of algorithms ( we can have the shortest path that a police car can take to arrive at a car crash)
- **Moscow List**
  - It would be better to implement should functionalities for a higher grade
  - Move „turn right signals” feature from should to could
  - Instead of „pre-defined environments for traffic” write create traffic templates with number of cars per hour(e.g. daytime) and move the feature to should
  - Specify that some features are together or separate ( for example, traffic lights and zebra crossing)
  - For the help section, you can add tips

## **Topic 2: URS document**

- Prepare a Sketch of UI
- We didn't have more time to discuss our questions related to the URS document

## **Topic 3: Plan for iteration 1**

- For the first iteration plan, it's no problem if we cannot implement all the features. We need to mention why they failed to be implemented on time.

## **Topic 4: Work Division Report**

- We didn't have time to discuss anything related to the Work Division Report
